Stakeholder Feedback on a pCODR Expert Review  
Committee Initial Recommendation  
(Sponsor)**

**Entrectinib (Rozlytrek) for ROS1-positive Non-Small  
Cell Lung Cancer**

January 27, 2021

### 3 Feedback on pERC Initial Recommendation

Name of the Drug and Indication(s):	ROZLYTREK® (entrectinib). Funding request: As monotherapy for the first-line treatment of patients with ROS1-positive locally advanced or metastatic non-small cell lung cancer
Eligible Stakeholder Role	Sponsor and Manufacturer
Organization Providing Feedback	Hoffmann-La Roche Limited

\* CADTH may contact this person if comments require clarification. Contact information will not be included in any public posting of this document by CADTH.

#### 3.1 Comments on the Initial Recommendation

a) Please indicate if the stakeholder agrees, agrees in part, or disagrees with the initial recommendation:

Agrees                       Agrees in part                       Disagrees

Hoffmann-La Roche Ltd. agrees with the initial recommendation of ROZLYTREK (entrectinib) as monotherapy for the first-line treatment of patients with ROS1-positive locally advanced or metastatic non-small cell lung cancer (NSCLC). Roche agrees that entrectinib has a net clinical benefit based on clinically meaningful objective response rates (ORRs), intracranial responses in patients with baseline central nervous system (CNS) metastases, duration of response (DoR), progression-free survival (PFS), and a manageable toxicity profile.

Roche suggests adding in the recommendation that clinicians felt that entrectinib appears to be at least as effective and maybe slightly better than crizotinib.

Roche agrees that entrectinib aligns with the following patient values: delays disease progression, improves disease symptoms, has manageable toxicities, and offers an additional treatment option with a more convenient oral route of administration.

In summary, Roche supports early conversion of this initial recommendation to a final recommendation to expedite public access for ROLYTREK.

b) Please provide editorial feedback on the initial recommendation to aid in clarity. Is the initial recommendation or are the components of the recommendation (e.g., clinical and economic evidence) clearly worded? Is the intent clear? Are the reasons clear?

Page Number	Section Title	Paragraph, Line Number	Comments and Suggested Changes to Improve Clarity
1	pERC recommendation	3,2	Suggest removing the word “may” from this sentence. This implies uncertainty, and it is not clear to the reader where the uncertainty lies or why, specifically, the clinical benefit is qualified in this sentence. The lack of comparative

			effectiveness is discussed in other sections of the recommendation.
1	pERC recommendation	3, 8	It is not clear to the reader why pERC believes that there is uncertainty in the magnitude of benefit.  This phrase refers to the limitations of non-comparative studies. Assuming that pERC is referring to comparative efficacy, adding the word “relative” before the word “magnitude” would be more specific.
9	Overall Clinical Benefit	1	Suggest adding in the recommendation that clinicians felt that entrectinib appears to be at least as effective and maybe slightly better than crizotinib.  It provides perspective on clinician’s opinion around entrectinib vs. crizotinib given there is no comparative evidence.

### 3.2 Comments Related to Eligible Stakeholder Provided Information

Notwithstanding the feedback provided in part a) above, please indicate if the stakeholder would support this initial recommendation proceeding to final recommendation (“early conversion”), which would occur two business days after the end of the feedback deadline date.

|---|---|
| <input checked="" type="checkbox"/> Support conversion to final recommendation.<br><br>Recommendation does not require reconsideration by pERC. | <input type="checkbox"/> Do not support conversion to final recommendation.<br><br>Recommendation should be reconsidered by pERC. |
|---|---|

If the eligible stakeholder does not support conversion to a final recommendation, please provide feedback on any issues not adequately addressed in the initial recommendation based on any information provided by the stakeholder during the review.

Please note that new evidence will be not considered at this part of the review process, however, it may be eligible for a resubmission.

Additionally, if the eligible stakeholder supports early conversion to a final recommendation; however, the stakeholder has included substantive comments that requires further interpretation of the evidence, the criteria for early conversion will be deemed to have not been met and the initial recommendation will be returned to pERC for further deliberation and reconsideration at the next possible pERC meeting.

## Template for Stakeholder Feedback on a pCODR Expert Review Committee Initial Recommendation

### 1 About Stakeholder Feedback

CADTH invites eligible stakeholders to provide feedback and comments on the pan-Canadian Oncology Drug Review Expert Review Committee (pERC) initial recommendation.

As part of the CADTH's pan-Canadian Oncology Drug Review (pCODR) process, pERC makes an initial recommendation based on its review of the clinical benefit, patient values, economic evaluation and adoption feasibility for a drug. The initial recommendation is then posted for feedback from eligible stakeholders. All eligible stakeholders have 10 business days within which to provide their feedback on the initial recommendation. It should be noted that the initial recommendation may or may not change following a review of the feedback from stakeholders.

CADTH welcomes comments and feedback from all eligible stakeholders with the expectation that even the most critical feedback be delivered respectfully and with civility.

#### A. Application of Early Conversion

The stakeholder feedback document poses two key questions:

##### 1. Does the stakeholder agree, agree in part, or disagree with the initial recommendation?

All eligible stakeholders are requested to indicate whether they agree, agree in part, or disagree with the initial recommendation, and to provide a rationale for their response. Please note that if a stakeholder agrees, agrees in part or disagrees with the initial recommendation, they can still support the recommendation proceeding to a final recommendation (i.e. early conversion).

##### 2. Does the stakeholder support the recommendation proceeding to a final recommendation (“early conversion”)?

An efficient review process is one of the key guiding principles for CADTH's pCODR process. If all eligible stakeholders support the initial recommendation proceeding to a final recommendation and that the criteria for early conversion as set out in the [Procedures for the CADTH Pan-Canadian Oncology Drug Review](#) are met, the final recommendation will be posted on the CADTH website two business days after the end of the feedback deadline date. This is called an “early conversion” of an initial recommendation to a final recommendation.

For stakeholders who support early conversion, please note that if there are substantive comments on any of the key quadrants of the deliberative framework (e.g., differences in the interpretation of the evidence), the criteria for early conversion will be deemed to have **not** been met and the initial recommendation will be returned to pERC for further deliberation and reconsideration at the next possible pERC meeting. Please note that if any one of the eligible stakeholders does not support the initial recommendation proceeding to a final recommendation, pERC will review all feedback and comments received at a subsequent pERC meeting and reconsider the initial recommendation.

## B. Guidance on Scope of Feedback for Early Conversion

Information that is within scope of feedback for early conversion includes the identification of errors in the reporting or a lack of clarity in the information provided in the review documents. Based on the feedback received, pERC will consider revising the recommendation document, as appropriate and to provide clarity.

If a lack of clarity is noted, please provide suggestions to improve the clarity of the information in the initial recommendation. If the feedback can be addressed editorially this will be done by the CADTH staff, in consultation with pERC, and may not require reconsideration at a subsequent pERC meeting.

The final recommendation will be made available to the participating federal, provincial and territorial ministries of health and provincial cancer agencies for their use in guiding their funding decisions and will also be made publicly available once it has been finalized.

## 2 Instructions for Providing Feedback

- The following stakeholders are eligible to submit feedback on the initial recommendation:
  - The sponsor and/or the manufacturer of the drug under review;
  - Patient groups who have provided input on the drug submission;
  - Registered clinician(s) who have provided input on the drug submission; and
  - CADTH's Provincial Advisory Group (PAG)
- Feedback or comments must be based on the evidence that was considered by pERC in making the initial recommendation. No new evidence will be considered at this part of the review process.
- The template for providing stakeholder is located in section 3 of this document.
- The template must be completed in English. The stakeholder should complete those sections of the template where they have substantive comments and should not feel obligated to complete every section, if that section does not apply.
- Feedback on the initial recommendation should not exceed three pages in length, using a minimum 11-point font on 8 ½" by 11" paper. If comments submitted exceed three pages, only the first three pages of feedback will be provided to the pERC for their consideration.
- Feedback should be presented clearly and succinctly in point form, whenever possible. The issue(s) should be clearly stated and specific reference must be made to the section of the recommendation document under discussion (i.e., page number, section title, and paragraph). Opinions from experts and testimonials should not be provided. Comments should be restricted to the content of the initial recommendation, and should not contain any language that could be considered disrespectful, inflammatory or could be found to violate applicable defamation law.
- References may be provided separately; however, these cannot be related to new evidence.
- CADTH is committed to providing an open and transparent cancer drug review process and to the need to be accountable for its recommendations to patients and the public. Submitted feedback must be disclosable and will be posted on the CADTH website.
- The template must be filed with CADTH as a Microsoft Word document by the posted deadline.
- If you have any questions about the feedback process, please e-mail [requests@cadth.ca](mailto:requests@cadth.ca)
