Stakeholder Feedback on a pCODR Expert
Review Committee Initial Recommendation
(Registered Clinician)**

Sonidegib (Odomzo) for Basal Cell Carcinoma

April 29, 2021

3 Feedback on pERC Initial Recommendation

Name of the Drug and Indication(s):	Sonidegib/ histologically confirmed locally advanced basal cell carcinoma (laBCC) that is not amenable to radiation therapy or curative surgery.
Eligible Stakeholder Role	Registered clinicians feedback
Organization Providing Feedback	Ontario Health (Cancer Care Ontario)

* CADTH may contact this person if comments require clarification. Contact information will not be included in any public posting of this document by CADTH.

3.1 Comments on the Initial Recommendation

a) Please indicate if the stakeholder agrees, agrees in part, or disagrees with the initial recommendation:

Agrees Agrees in part Disagrees

Please explain why the stakeholder agrees, agrees in part or disagrees with the initial recommendation. If the stakeholder agrees in part or disagrees with the initial recommendation, please provide specific text from the recommendation and rationale. Please also highlight the applicable pERC deliberative quadrants for each point of disagreement. The points are to be numbered in order of significance.

Sonidegib and vismodegib have similar efficacy with an ORR for Sonidegib being 47% and 43% for vismodegib. The ERIVANCE trial that vismodegib was approved on was also a phase II trial with a similar patient population and with its primary end point also being ORR. Though we can't say that sonidegib is better than vismodegib, it is very similar. Initially the sonidegib investigators believed that the 800 mg dose was going to be superior to 200mg, however the efficacy was similar but was more toxic and the 200mg dose was chosen. The number of patients treated for laBCC with sonidegib (n=66) and vismodegib (N=63) was similar. There are many examples in oncology where we have similar drugs from different manufacturers approved for the same treatment indication. A few of these examples include: anastrozole and letrozole for breast cancer, cetuximab and panitumumab for colorectal cancer, nivolumab and pembrolizumab for melanoma,

Patients often do not tolerate vismodegib and struggle with toxicity, this often leads to dose interruptions or stopping of treatment as dose reductions are not an option. Although sonidegib has similar toxicity profile as vismodegib, dose reduction is allowed for sonidegib which is an advantage for the patient. This may keep patients on treatment longer resulting in clinical benefit with longer treatment exposure. Given the current data, the DAC recommends that sonidegib be used as an alternative for patients who do not tolerate vismodegib.

b) Please provide editorial feedback on the initial recommendation to aid in clarity. Is the initial recommendation or are the components of the recommendation (e.g., clinical and economic evidence) clearly worded? Is the intent clear? Are the reasons clear?

3.2 Comments Related to Eligible Stakeholder Provided Information

Notwithstanding the feedback provided in part a) above, please indicate if the stakeholder would support this initial recommendation proceeding to final recommendation (“early conversion”), which would occur two business days after the end of the feedback deadline date.

- | | |
|--|--|
| <input type="checkbox"/> Support conversion to final recommendation. | <input checked="" type="checkbox"/> Do not support conversion to final recommendation. |
| Recommendation does not require reconsideration by pERC. | Recommendation should be reconsidered by pERC. |

If the eligible stakeholder does not support conversion to a final recommendation, please provide feedback on any issues not adequately addressed in the initial recommendation based on any information provided by the stakeholder during the review.

Please note that new evidence will be not considered at this part of the review process, however, it may be eligible for a resubmission.

Additionally, if the eligible stakeholder supports early conversion to a final recommendation; however, the stakeholder has included substantive comments that requires further interpretation of the evidence, the criteria for early conversion will be deemed to have not been met and the initial recommendation will be returned to pERC for further deliberation and reconsideration at the next possible pERC meeting.

Template for Stakeholder Feedback on a pCODR Expert Review Committee Initial Recommendation

1 About Stakeholder Feedback

CADTH invites eligible stakeholders to provide feedback and comments on the pan-Canadian Oncology Drug Review Expert Review Committee (pERC) initial recommendation.

As part of the CADTH's pan-Canadian Oncology Drug Review (pCODR) process, pERC makes an initial recommendation based on its review of the clinical benefit, patient values, economic evaluation and adoption feasibility for a drug. The initial recommendation is then posted for feedback from eligible stakeholders. All eligible stakeholders have 10 business days within which to provide their feedback on the initial recommendation. It should be noted that the initial recommendation may or may not change following a review of the feedback from stakeholders.

CADTH welcomes comments and feedback from all eligible stakeholders with the expectation that even the most critical feedback be delivered respectfully and with civility.

A. Application of Early Conversion

The stakeholder feedback document poses two key questions:

1. Does the stakeholder agree, agree in part, or disagree with the initial recommendation?

All eligible stakeholders are requested to indicate whether they agree, agree in part, or disagree with the initial recommendation, and to provide a rationale for their response. Please note that if a stakeholder agrees, agrees in part or disagrees with the initial recommendation, they can still support the recommendation proceeding to a final recommendation (i.e. early conversion).

2. Does the stakeholder support the recommendation proceeding to a final recommendation (“early conversion”)?

An efficient review process is one of the key guiding principles for CADTH's pCODR process. If all eligible stakeholders support the initial recommendation proceeding to a final recommendation and that the criteria for early conversion as set out in the [Procedures for the CADTH Pan-Canadian Oncology Drug Review](#) are met, the final recommendation will be posted on the CADTH website two business days after the end of the feedback deadline date. This is called an “early conversion” of an initial recommendation to a final recommendation.

For stakeholders who support early conversion, please note that if there are substantive comments on any of the key quadrants of the deliberative framework (e.g., differences in the interpretation of the evidence), the criteria for early conversion will be deemed to have **not** been met and the initial recommendation will be returned to pERC for further deliberation and reconsideration at the next possible pERC meeting. Please note that if any one of the eligible stakeholders does not support the initial recommendation proceeding to a final recommendation, pERC will review all feedback and comments received at a subsequent pERC meeting and reconsider the initial recommendation.

B. Guidance on Scope of Feedback for Early Conversion

Information that is within scope of feedback for early conversion includes the identification of errors in the reporting or a lack of clarity in the information provided in the review documents. Based on the feedback received, pERC will consider revising the recommendation document, as appropriate and to provide clarity.

If a lack of clarity is noted, please provide suggestions to improve the clarity of the information in the initial recommendation. If the feedback can be addressed editorially this will be done by the CADTH staff, in consultation with pERC, and may not require reconsideration at a subsequent pERC meeting.

The final recommendation will be made available to the participating federal, provincial and territorial ministries of health and provincial cancer agencies for their use in guiding their funding decisions and will also be made publicly available once it has been finalized.

2 Instructions for Providing Feedback

- The following stakeholders are eligible to submit feedback on the initial recommendation:
 - The sponsor and/or the manufacturer of the drug under review;
 - Patient groups who have provided input on the drug submission;
 - Registered clinician(s) who have provided input on the drug submission; and
 - CADTH's Provincial Advisory Group (PAG)
- Feedback or comments must be based on the evidence that was considered by pERC in making the initial recommendation. No new evidence will be considered at this part of the review process.
- The template for providing stakeholder is located in section 3 of this document.
- The template must be completed in English. The stakeholder should complete those sections of the template where they have substantive comments and should not feel obligated to complete every section, if that section does not apply.
- Feedback on the initial recommendation should not exceed three pages in length, using a minimum 11-point font on 8 ½" by 11" paper. If comments submitted exceed three pages, only the first three pages of feedback will be provided to the pERC for their consideration.
- Feedback should be presented clearly and succinctly in point form, whenever possible. The issue(s) should be clearly stated and specific reference must be made to the section of the recommendation document under discussion (i.e., page number, section title, and paragraph). Opinions from experts and testimonials should not be provided. Comments should be restricted to the content of the initial recommendation, and should not contain any language that could be considered disrespectful, inflammatory or could be found to violate applicable defamation law.
- References may be provided separately; however, these cannot be related to new evidence.
- CADTH is committed to providing an open and transparent cancer drug review process and to the need to be accountable for its recommendations to patients and the public. Submitted feedback must be disclosable and will be posted on the CADTH website.
- The template must be filed with CADTH as a Microsoft Word document by the posted deadline.
- If you have any questions about the feedback process, please e-mail requests@cadth.ca
